Education

2024 -
**Autonomous Systems
MSc**

Technical University of
Denmark (DTU)

2019 - 2023
**Computer Science
Engineering BSc**

University of Szeged

Expertise

- Embedded systems
- ML, DL, AI, Cybersecurity
- ROS/ROS2, UAV, RTOS
- Python, C, C++, MATLAB
- Git, Docker, Gitlab, Linux

Language

Hungarian

English

Danish

Spanish

Experience

2024 October - **TOTALENERGIES Automation Engineer**

My main position is in RPA (Robotic Process Automation), where I design, develop and maintain scripts used by colleagues across the company to support finance-related tasks.

Skills: Python, Microsoft power apps, System design

2023 march - 2024 July **Robert Bosch Cybersecurity Engineer**

I tested cybersecurity software modules for automotive transmission systems in laboratory environments, gaining hands-on experience with specialised testing equipment. I also co-led a Power BI project to develop a fast, automated application featuring interactive graphs and reports to showcase the bugs fixed and

Skills: C, PowerBI, Cybersecurity, Compliance with ASPICE and ISO 26262.

2022 February - 2023 February **TEConcept Hungary Software developer**

I developed fast and robust software components for industrial communication in C++ based on IO-Link. I gathered requirements, designed the software architecture, created and executed tests, and implemented the software modules.

Skills: UART, I2C, ISP, Jenkins, Use of laboratory equipment.

OTHER EXPERIENCE

I have attended ATENA workshop in Poland about Artificial Intelligence and its uses in real life in a special summer school.

I went on Echange to Universidad Politécnica de Cataluña (UPC) where I learned about human computer interaction, research, innovation and business.
